Pulldown RB

The Machine

PULLDOWN 120 RB is a small but effective band saw for cutting arc tubes and profiles. The powerful two-speed engine and hard metal blade guide ensure the required cutting performance. With the adjustable arms of the clamping table you can easily place the material to the required angle. Well readable scales are placed directly on the table console and its arms. Two blade speeds are ideal for cutting structural (70 m.min⁻¹) and stainless (30 m.min⁻¹) steels. Downfeed of the saw frame is provided manually from the front side of the machine.

Well readable angle scale is situated directly on the table.

Two-speed engine.

Ergonomic handle for starting the saw band and the arm's cutting.

Pulldown 120 RB / Technical parameters

	□	○
Max. material diameter	0°	120 mm
Saw band dimensions	1620 x 13 x 0,65 mm	
Drive	0,25 / 0,37 kW, 3 x 400 V, 50 Hz	
Saw band speed	30 - 70 m/min	
Width	414 mm	
Length	755 mm	
Height	752 mm	
Weight	38 kg	

For more information about the machine and the possibility of extending it, please contact our sales department.
